NetSuite and Daston Streamline Operations with

UNIFIED ERP, DCAA COMPLIANCE IN THE CLOUD

Overview

Midmarket federal contractors that have been struggling to keep their DCAA compliance and financial systems in sync, finally have a solution. For the first time in history, a true-cloud ERP solution with built-in DCAA compliance is available! NetSuite, the undisputed #1 cloud ERP, and its services practice have partnered with Daston Corporation to fill the solution gap in this marketplace. Daston's DCAA-on-Demand is a fit for contractors spanning any and all industries. Companies that are involved in segments such as financial services, health care, defense, information technology, science and space technology in any capacity or combination, are all positioned well to benefit from this solution.

"The Daston+NetSuite Solution has been invaluable to us. The NetSuite ERP solution fit our need for billing products and subscriptions in different lines of business. With Daston DCAA-on-Demand, we're also able to extend that efficiency to our federal contracting business. For any solution provider playing in the government contracting space, this software package is a must."

Tim Shave
Senior Manager of Finance and Systems

ORACLE + **NET**SUITE

"Companies who do not routinely update their reporting and accounting practices are at risk of losing federal contracts or paying thousands of dollars in fines. Daston DCAA-on-Demand is a world-class, fully customizable solution and, paired with NetSuite, provides one of the most compelling solutions for DCAA compliance in the cloud" **Gary Callen,** President, Daston Corporation

Furthermore, the module is not merely "Built-for-NetSuite", it's natively built on top of NetSuite as a "SuiteApp". In other words, the experience is truly seamless for the end user and the modules appears on the dashboard of NetSuite's already robust ERP.

Benefit

DCAA-on-Demand in NetSuite enables government contractors to meet Federal contractor regulatory compliance requirements without the cumbersome manual processes and error-prone spreadsheets of the past.

Features

	NetSuite for Services Firms	DCAA-on-Demand
Project Management	Enables project managers and teams members to collaborate on projects and maintain current and accurate project status at all times.	Provides functionality that captures total costs of projects through actual payroll cost and indirect cost allocations to projects and associated tasks.
Project Accounting	Connects project activities with company financials to ensure accurate accounting and billing throughout the project lifecycle.	Allows your firm to identify and accumulate indirect costs by logical cost grouping (cost pools), with due consideration of the reasons for incurring such costs to meet DCAA compliance.
Time Sheet Management	Capture detailed timesheets quickly, whether in the office or on the road. NetSuite timesheet management allows mapping of timesheet entry and approvals to your unique business requirements—ensuring you capture the right information the first time, every time.	Enhances the NetSuite timesheets to comply with DCAA timekeeping regulations and enabled specific project controls for transactions charged to varying goverment contracts.
Project Billing	Automates your billing contracts on projects by providing flexible billing options—based on completing project work, achieving project milestones or according to a schedule of dates.	Enhances and extends billing, unbilled and revenue processes to accommodate all government vehicles to include Cost Reimbursable, Fixed Price and Cost Reimbursable calculations and formats.
Analytics	Provides robust dashboards, reporting and analytical tools that provide a real-time view into your services organization.	Adds numerous reports to support audit requirements to include Statement of Indirect Expenses, Project Summary (PSR), Project Labor Summary and Project Non-Labor Summary Reports.
Anytime, Anywhere Access	Supports the way your services teams work and enables productivity with anytime, anywhere web and mobile access.	Supports DCAA compliant time and expense tracking via mobile device and web as needed.

As you consider how your firm manages multiple streams of revenue in accordance with government compliance, a conversation with our team about the NetSuite + Daston Solution will serve you well. Please visit our webpage for more information!
